

PROJECT PLANNING PHASE

MILESTONE & ACTIVITY LIST

Date	31 October 2022
Team ID	PNT2022TMID49087
Project Name	AI-Powered Nutrition Analyzer for Fitness Enthusiasts

Milestone:

Artificial Intelligence forms the basis for all computer learning and is the future of all complex decision making. To build a model which is used for classifying the fruit depends on the different characteristics like colour, shape, texture etc. Here the user can capture the images of different fruits and then the image will be sent the trained model. The model analyses the image and detect the nutrition based on the fruits like (Sugar, Fibre, Protein, Calories, etc.).

Activity List:

In Project Planning provides structure and foresight for the execution stage, helping to eliminate wasteful activities and patterns. In this Activity can shows the various activity are allocated and done by the team members. We can split into four steps of phrase are

Phrase 1: Information Collection and Requirement Analysis.

Phrase 2: Project Planning and Developing Modules.

Phrase 3: Implement the High Accuracy Deep Learning Algorithm to perform.

Phrase 4: Deploying the models on Cloud and Testing the Model and UI performance
